

Digital Desktop 9750

For smart transcription

This desktop model boosts the digital transcription process. Exchangeable SD/Multimedia cards, the .dss file format for excellent playback, and optimum use of storage space take transcription to a new level. Other features include a visual workflow display that indicates the number of files, length of dictation and priority jobs. With the ergonomic foot control, the Digital Desktop 9750 is ready for transcription.

All in one

- The visual workflow display shows the number of files, length of dictation and priority files
- Fast access to any part of the dictation using the skip function
- A graphical, backlit LC display and real-time counter allow transcriptionists to efficiently manage their workload
- Use this versatile machine to also record dictation files simply by adding a hand microphone* or the conference microphone 9172.

* LFH 278/10 or LFH 276/10

SpeechExec Dictate & Transcribe

Simply get on with your job

The SpeechExec dictation and transcription software includes features to make document creation easy and straightforward. A job list organizes recordings and contributes to greater accuracy. Efficient transcription is bolstered by the display of key job data such as priority indexing or author comments. All in all, SpeechExec is the easy solution that simply lets you get on with your job.

Key benefits of SpeechExec Dictate

- Efficient handling of sound files makes job retrieval simple and fast
- Priority indexing allows authors to easily define urgent jobs
- Job status information tracks work in progress
- Transfer dictation files to the transcriptionist via email or FTP

Key benefits of SpeechExec Transcribe

- Simple, intuitive user interface for easy operation
- Actual job information during transcription provides all relevant dictation data, such as file length, author name, keywords and priority status
- An on-screen indicator shows the actual position within a recorded file during transcription
- A job status indicator shows whether a dictation is pending, in progress or completed

Custom-tailored

Technologies for ultimate compatibility

Designed around standards

The Digital Pocket Memo is designed around standardized technologies. From SD (or MMC) cards, mini-USB cables, batteries and sockets, to the industry standard .dss file format for speech processing, Philips employs non-proprietary accessories and technologies for the ultimate compatibility.

Digital Speech Standard (.dss)

The .dss file format is the international standard for professional speech processing. Offering excellent audio quality for recorded voice, .dss files allow a high compression rate, reduced file sizes, network traffic and required storage capacity. The format also allows additional information, such as the author's name, to be stored in the file header, further facilitating file organization.

Accelerate your document creation process

Digital dictation is essential to enhance organization-wide communication and document workflow. It facilitates new ways of organizing workloads more efficiently, boosting productivity at every level.

Philips digital dictation solutions are designed to deliver on our "sense and simplicity" promise through customer-driven features such as:

Superior sound quality with the .dss file format

The international standard for professional speech processing offers outstanding audio quality for recorded voice and precise playback for accurate transcription.

Total flexibility

Digital files allow instant access to any part of the recording through editing functions such as inserting, deleting or overwriting text that can be performed quickly and easily.

Easy working practices

Digital files are available immediately, speeding up transcription and document turnaround time. File transfer via a network or e-mail is simple and supports remote workflows.

Future-proof

Our digital dictation solutions work with the latest technologies and comply with all industry standards for the ultimate compatibility.

Digital Pocket Memo 9370

Get set for digital

The Digital Pocket Memo 9370 is always ready to take your dictation. Handy, powerful and efficient, you can easily control the latest recording technology with push buttons. With an exchangeable SD/Multimedia card, the Digital Pocket Memo 9370 has virtually unlimited recording capacity, and .dss file format produces excellent sound quality. Completed files can be quickly transferred to a PC via a USB cable for storage or professional transcription.

The Digital Pocket Memo 9370 is packaged with SpeechExec Dictate, the easy-to-use dictation software from Philips for perfect management of voice files.

Quick control

- Asymmetrical and ergonomic design for unparalleled user-friendly operation
- Push buttons for single-handed operation
- Intuitive menu control with 'Smart buttons'
- Large backlit LCD screen for an at-a-glance overview
- .dss file format for minimum file size while maintaining clear sound quality
- Automatic file download via a USB cable or the optional docking station

Digital Starter Kit 9397

Always hand in hand

The versatile new Digital Starter Kit 9397 guarantees high digital quality from dictation to transcription. The latest recording technology combines ergonomically designed hardware with ingenious dictation and transcription software.

The powerful Digital Pocket Memo 9370 offers virtually unlimited recording capacity with crystal clear sound quality. The SpeechExec Starter Kit software, together with the new USB foot control and stereo earphones, guarantees a smooth transcription process. Set your individual preferences for dictation and transcription.

Everything you need

- Digital Pocket Memo with push buttons for single-handed operation
- Intuitive control with 'Smart buttons'
- Ergonomic foot control for easy, professional transcription
- Lightweight stereo earphones for excellent playback
- SpeechExec Starter Kit software for efficient handling of dictation files
- Automatic file download to a PC for quick transcription

USB Docking Station 9120

Your comfortable companion

Place your Digital Pocket Memo in the USB docking station – the easiest way to transfer dictation files to the PC in seconds. At the same time, the USB docking station can be used to recharge the batteries of the Digital Pocket Memo to keep it always ready for use. Enjoy the freedom of hands-free dictating by placing the Digital Pocket Memo in the docking station. The file will be recorded directly onto your PC.

Multi-functional accessory

- Upload dictation files from your Digital Pocket Memo directly to a PC
- Fast-charge the Digital Pocket Memo's batteries, even when it is not switched on
- Use the power supply to charge the Digital Pocket Memo while traveling
- Green and yellow LEDs indicate battery status and file transfer mode

SpeechExec Transcription Set 7177

Transcription basics

The SpeechExec Transcription Set 7177 is a digital transcription system specifically designed to make transcription easy and intuitive. The combination of ergonomic accessories and innovative transcription software lets you easily and efficiently manage all jobs.

The ergonomic design of the new Philips foot control sets new standards in professional dictation. Transcriptionists can stop and start file playback with only a slight movement of the heel, without lifting the foot unnecessarily, which increases both efficiency and user comfort.

The lightweight under-the-chin style stereo earphones are designed to deliver excellent sound quality, with soft ear cushions for wearing comfort, and a hanging bracket that attaches the earphones to a monitor.
